COUNSELLOR'S CORNER: Final Exams

Whether to panic or to prepare. Whether to ask or to study. Whether to become enlightened or to remain in the dark, hoping for the best. How you use your time and energy is up to you and will determine your level of success or failure.

To go into the exam period with your eyes wide open, you need to know:

- how many exams you have and in which subjects;
- when, where and for how long they are scheduled;
- what material will be covered with emphasis on which areas;
- what format the exam will have (multiple choice, essay, short answer);
- what percentage of your final mark the exam covers.

About three weeks before exams start, mark the times and locations of each exam on a calendar. For each course, list what you need to study and the sources you will use (textbook, class notes, lab, assignments). Estimate the amount of study time you will need and include study periods on the calendar. By planning ahead, you know you will have time for each subject.

Use all sources of help available to you: old exams, classmates, study groups, class review time, read notes or highlighted sections, ask questions and chapter questions. Ask your faculty for help and information about the exam (avoid common mistakes).

- over-studying for the final exams and running out of time and energy for the effort;
- working hard for the course(s) you like and neglecting others;
- cramming, staying up all night, missing class, taking on a lot of extra work.

If you would like assistance in preparing for final exams, come to Counseling Services.

It's been a bad week for me. I've been in a lot of traffic jams, and I've been in a lot of accidents.

I feel like I'm in a bad mood, and I'm not sure if it's the traffic or the weather. I'm not sure if it's the traffic or the weather. I'm not sure if it's the traffic or the weather.
